

Helix BioMedix to Present at Annual International Technology Transfer Forum

May 06, 2004 - Bothell, Washington

Helix BioMedix, Inc. (HXBM.OB) today announced that David Drajeske, Director of Business Development, will present at The 21st Annual International Technology Transfer Forum, in Reston, VA, being held at the Hyatt Regency Reston Town Center. Mr. Drajeske will present on Monday, May 10th, at 2:15 p.m. in the Regency Ballroom. His talk, entitled "Peptides of the Immune System for Anti- Infectives and Wound Healing," will focus on the Company's recent pre-clinical results in its topical anti-infective, wound healing, and sexually transmitted disease programs.

He will also present "Peptides in Skin Care: A New Wrinkle," at 3:45 p.m. in the Lake Fairfax room. This talk will provide an overview of the Helix BioMedix consumer product portfolio and describe in detail the Company's recent successful anti-wrinkle cosmetic study.

About Helix BioMedix:

Helix BioMedix, Inc. is an early-stage biotechnology company that has a portfolio of issued patents which covers six distinct classes of peptides, covering over 100,000 unique peptide sequences. The company's mission is to become the industry leader in developing and commercializing small proteins known as bioactive peptides. The antimicrobial and wound healing properties of these peptides qualify them for inclusion in a wide range of both pharmaceutical and consumer products. The company is currently focused on the development of selected peptides as topical anti-infectives and in wound healing. Non-pharmaceutical applications being pursued by Helix BioMedix include adjuvants for cosmetics/cosmeceuticals, personal care, plant health, animal health and wide-spectrum biocides. More information about the company and its proprietary peptides can be found on the company's website at www.helixbiomedix.com.
